CORPORATE GOAL

- To give our customer the best products and services to suit their needs and providing feedbacks.
- To enhance our customers' image and working hand in hand to develop meaningful relationships.

CORPORATE VISION

To be recognized as a world class company in training, development, quality and services meeting the needs of customers / clients.

R&H RESOURCES

CORPORATE MISSION

Mission Statement

To provide the best possible service, materials, safety, cost control and workmanship in each project, thus generating a high level of satisfaction and the customer's repeat business

In order to pursue this purpose and to provide our Customers the best service possible, it is Our Mission to maintain the following conditions within our company.

Safety

Maintaining safe work sites by establishing and implementing safety policies and procedures, providing on going safety training for all company personnel, having regular safety inspections of all work sites and by thorough post accident investigation.

Quality

Having a continuous improvement process aimed at achieving constant customer satisfaction by implementing a system of processes, procedure, controls and employee training to insure the quality of our services.

Efficiency

Continuously improving on our work efficiency by being up to date with the latest products equipment and application methods in our industry, by ongoing employee training and through a system of employee input and involvement.

The Best Employees

Attracting and retaining the best people in our industry by providing top pay and benefits, ongoing employee training, promoting teamwork and involvement and by providing all employee an opportunity for advancement.

SCOPE OF OPERATION

In all applications, system scaffolds in general, our quality scaffolding such as BS 1139, JIS and Modular scaffold have several advantages over traditional tube and fitting scaffolds. This is illustrated by ever-increasing use of this type of scaffold in the construction environment, and the trend within the scaffolding industry away from tube and fittings when replacing or increase stocks of materials.

R&H RESOURCES is aware of this situation and offers a comprehensive erection service based on the efficient system, though it is still able to provide conventional scaffolding where circumstances demand.

The erective system has a wide variety of applications, and major benefits to the customer include :

Speed – The in-built joints, clearly identifiable components and the strong, simple wedge connections, guarantee a faster erection time.

Safety – In the very earliest stage of the erection progress, the wedge connections ensure that ledgers and braces are secured to the standards, and there is no risk of material falling. The wedge lock system guarantees that all ledgers and diagonal braces are secured immediately they are placed. This allows immediate, safe erection by just one person at any height. The BS 1139 joint enables a reduction in material usage as compared to traditional scaffolding, for instance it dispenses with the need for ledger bracing in many applications.

In the industrial field, scope of scaffold has proved its advantages in many locations. It allows working platforms, whether in the form of towers, suspended or hanging scaffolds, to be quickly formed to facilitate all maintenance and installation of insulation, and construction projects.

SCOPE OF OPERATION

In power station and chemical plants, where installations and pipeline required regular checks and maintenance, the significantly faster erection times result in a great benefit in terms of reduced shutdown times. In these cases, and particularly when an unforeseen disruption occurs, system scaffolds help to minimize downtime, their inherent safety and fast construction are a great advantage.

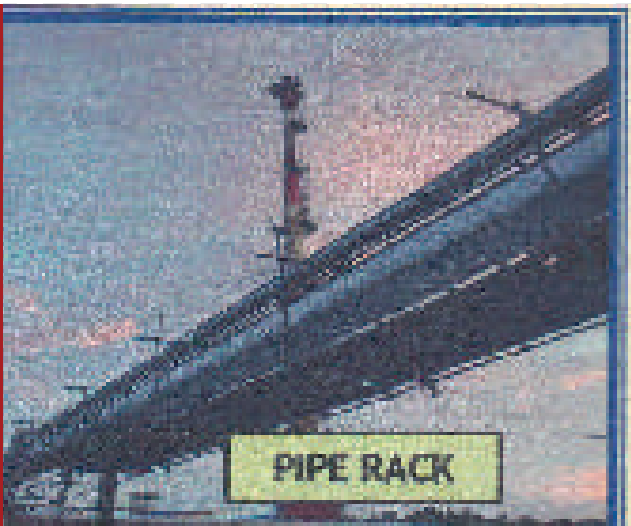

Where scaffolds are required for access inside tanks and ovens system scaffolding offers several significant advantages over traditional tube and fitting scaffolds :

- Where access is restricted by the need to pass materials through manholes or other such small openings, the compact size of system components makes handling easier.
- When working in conditions of poor lighting or extremes of temperature, the built in fixings and simple erection procedure makes for faster and safer erection.

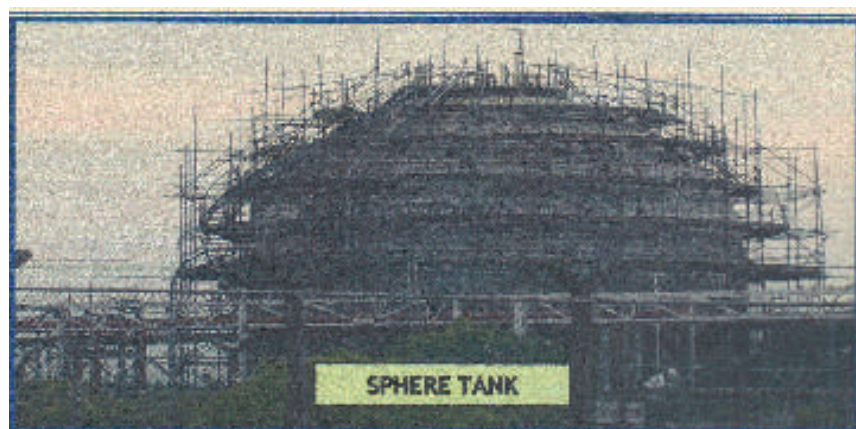

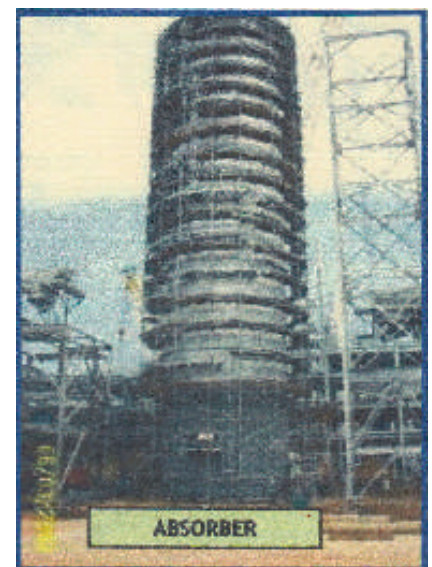

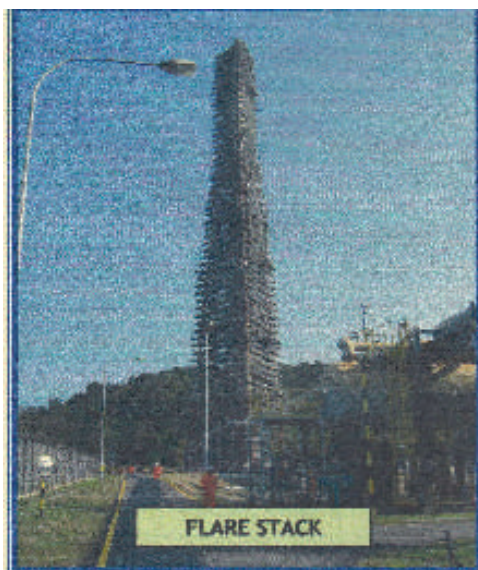

Therefore, our scaffolds have been preferred by various sectors from Onshore and Offshore applicators to general contract.

R&H RESOURCES

R&H RESOURCES

R&H RESOURCES

Our projects vary in size and complexity and it's carried out throughout Malaysia. Our customers include the following:

Projects

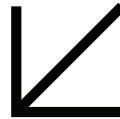

- 01** RM LEOPAD SDN BHD
- 02** KLANG VALLEY SDN BHD

- 12** TSR SINERGI(OSH CONSULTANT)
- 13** MLCL SDN BHD(OSH CONSULTANT)
- 14** TS SDN BHD (OSH CONSULTANT)Project
- 15** FACTORY(OSH CONSULTANT)

The contract varies in size from RM 10,000.00 to RM 1,000,000.00 in value and mainly carried out in lump sum format, however R&H RESOURCES is prepared to work on a variety of contract styles depending on our client's requirements. All the above have been our core disciplines of scaffolding.

10,000.00-1000000.00

QUALITY ASSURANCE

R&H RESOURCES operates a Quality Management System.

The Quality System has been designed to ensure that all access and support scaffolding is constructed in accordance with laid down specification, statutory regulations and codes of practice, by suitably trained and qualified personnel using approved materials.

These aims are achieved by means of written procedures covering training and safety.

Through its Quality System, R&H RESOURCES aims to offer a constantly improving service to its customers by involving all company personnel in matters relating to quality and safety.

R&H RESOURCES

In recent years, the demand for constant improvement in the quality of the goods and services offered by R&H RESOURCES, has grown considerably.

In order to operate successfully, it is essential that the company provide a high quality service.

In order to maintain and expand the company's operations, attention to quality, safety and the environment is essential.

The management of R&H RESOURCES have implemented and developed a program for this purpose covering the following items:

01

Consideration of quality at all levels is a primary duty of every staff member of R&H RESOURCES.

02

Every employee makes it his or her aim to provide the highest quality of service at the lowest cost.

03

All suppliers and sub-contractors are expected to comply with our quality requirements.

04

Quality improvement should be a continuous process.

05

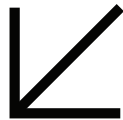

The management team has appointed a Quality Management, whose duties include the administration and revision of the Quality System

In the process of optimizing quality and output, full attention is paid to the efficient planning and organization of contracts, and also to the working conditions and health and safety of the employees and the environment.

To recognize and evaluate hazardous areas within the company's full range of activities and provide codes of practice to be followed as standard safe systems of working.

MONITORING

The company will carry out active monitoring of health and safety by regular inspection and checking to ensure standards are being implemented and management controls are working.

Re-active monitoring will also take place if things go wrong which will include investigating injuries, cases of illness, property damage and near misses.

CORPORATE POLICY

The Health & Safety at Work Act 1994 and all relevant Regulations are to be complied with at all times and all employees should contribute towards making work areas as safe as possible by continually appraising working practices and ensuring that the safest possible methods are adopted.

All employees and contractors are expected to provide and maintain safe work places and working environments, safe systems and methods of work, without risks to themselves or others and to promote high standards of health, safety and welfare.

Develop and maintain a positive safety, health and environmental culture.

Identify hazards and adequately assess and control risk to which employees and others may be exposed.

Continually improved our safety, health and environmental performance.

Promote appropriate safety, health and environmental training to develop employees as a key resources

Continually monitor the introduction of new legislation and operational guidelines to ensure compliance.

Being aware of how activities impact upon the environment and seek to minimize adverse effects by means of the best available techniques, not entailing excessive cost, through a policy of health and safety improvement in the workplace, control of pollution and care for the local environment.

To preserve, restore and enhance the built and natural heritage and also to reduce air, land and water pollution, e.g. toxic chemicals sprays, motor exhaust etc.

R&H RESOURCES PROJECTS GALLERY

R&H RESOURCES

R&H RESOURCES TODAY..... & INTO FUTURE.....

OSH CONSULTANT AND Scaffolders are required for most building work, both private & commercial, indoors and outdoors. The scope and variety of work is amazing with constant opportunities to increase our skill base.

The following
are the main
plans for the
company

01

Concentrate on export markets and explore new markets globally.

02

Widen the range of scaffolding structure.

03

To improve our product by forward integration.

04

Get a new wide range of experience in painting & blasting exposure.

05

To expand our business network into new market all countries.
